DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Either the Embodiment of Figure 2, or the Embodiment of Figure 3, or the Embodiment of Figure 4.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. **The reply must also identify the claims readable on the elected species, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The Species of Figure 2 employs opto-tactile feller and image processing sensor, the Species of Figure 3 employs tactile and optical scanners with image processing and mechanical sensing system, and the Species of Figure 4 employs an image processing sensor with integrated laser beam.

Generally, the Undersigned would have preferred to list the claims that read on each of the species, but the difficulties (i.e. potential 112(1,2) issues) are so numerous that this is not possible with any degree of certainty. Thus, Undersigned requests that Applicant elect a species and identify the claims are readable upon that elected species.
